

Hardware Business Management System

Purpose of This Document

Defines the project vision, business problem, scope, roles, and expected value.

Known Project Scope

- Mobile application and web administration system.
- Super Admin and Shop Admin roles.
- Products, purchases, sales, inventory and stock movement.
- Expenses, capital, debts, profit reporting, and 60/40 allocation support.
- Daily opening and daily closing workflows.
- Offline-first mobile storage using SQLite and central MySQL synchronization.
- Notifications, reports, audit trail, validation, error handling, security, and acceptance criteria.

Status Label Convention

Confirmed means the item is part of the agreed scope. Proposed means it is a recommended implementation detail that can still change. Pending Decision means the business owner must decide before a developer or Cloud AI treats it as final.

Status	Meaning	How to Treat It
Confirmed	Agreed project requirement or design direction.	Use as baseline for planning and implementation.
Proposed	Recommended approach that may still change.	Validate during design and owner review.
Pending Decision	Business, accounting, or technical rule not fully approved.	Do not hard code. Ask the owner or make configurable.

Project Vision

The vision is to build a reliable business management platform for one or more hardware shops. The system should make daily shop recording fast, make stock and money movement visible, reduce manual record confusion, and give the owner a clear view of business performance across shops.

Business Problem

- Multiple hardware shops can make stock, sales, purchases, expenses, debts, and capital difficult to track manually.
- Shop users need a fast way to record transactions even when internet is unstable.
- The owner needs reports that show stock movement, daily closing, debts, expenses, capital, and profit direction.
- The business needs auditability so corrections, deletions, approvals, and synchronization events can be traced.

System Scope

Area	Scope	Status
Platforms	Mobile application for shop work and web application for administration.	Confirmed
Roles	Super Admin and Shop Admin.	Confirmed
Operations	Products, stock, purchases, sales, expenses, capital, debts, daily opening and closing.	Confirmed
Finance	Profit reporting and 60/40 allocation support.	Confirmed
Offline mode	SQLite on mobile and MySQL central synchronization.	Confirmed
Control	Security, role permissions, audit trail, validation, reports, notifications.	Confirmed

Open Decisions That Must Not Be Invented

Decision Area	What Must Be Confirmed	Status
Profit formula	Exact formula for gross profit, net profit, cash profit, and expense treatment.	Pending Decision
Stock costing method	Latest cost, weighted average, FIFO, or another method for cost of goods sold.	Pending Decision
60/40 destination labels	Meaning of 60 percent and 40 percent amounts in business reports.	Pending Decision
Allocation timing	Daily, weekly, monthly, per closing, or owner-approved timing.	Pending Decision
Tax or VAT handling	Whether tax calculation is part of first release and how it affects reports.	Pending Decision
Returns refunds discounts	How returns, damaged goods, refunds, and discounts affect stock and profit.	Pending Decision

Acceptance of This Document

- The document is acceptable when the owner can identify which items are confirmed, proposed, and pending decision.
- A developer or Cloud AI can use the confirmed parts without needing to guess the project direction.
- Pending accounting rules remain visible and are not presented as final business rules.
